6                               **ABSTRACT OF THE DISCLOSURE**

7     The present invention relates to a cherry tree, *Prunus avium*, and more  
8     particularly to a new and distinct variety broadly characterized by a  
9     medium size, vigorous, hardy, self-sterile, productive and regular  
10    bearing tree.    The fruit matures under the ecological conditions  
11    described in late May, with first picking on May 25, 2003. The fruit is  
12    uniformly large in size, oblate in shape, clingstone in type, firm in  
13    texture, red in flesh color, and dark red in skin color. The variety was  
14    developed from an open pollinated seed from an undetermined cherry  
15    seedling.
